TECHNICAL SKILLS

- **Programming:** Python, Ada
- **Scientific Computing:** MATLAB
- **Engineering Tools:** Simulink
- **Version Control:** Git

LANGUAGES

- **French:** Native / Bilingual
- **Arabic:** Native
- **English:** Fluent

HOBBIES & INTERESTS

- Football
- Chess
- Hiking

PROFILE

First-year engineering student at ENSEEIHT specializing in Digital Sciences, supported by a rigorous scientific foundation acquired through two years of intensive preparatory classes at LYMED (Lycée d'Excellence Méditerranéen). Deeply interested in applied mathematics, physics, and computer science. Highly motivated, curious, and dedicated to developing strong technical problem-solving skills to tackle complex engineering challenges.

EDUCATION

ENSEEIHT - Toulouse INP

2026 – 2029

Engineering Student - Digital Sciences

Currently in the first year of the engineering cycle at one of France's top engineering schools, specializing in computer science, applied mathematics, and telecommunications.

- Developing foundational skills in algorithmics, software engineering, and formal methods.
- Applying mathematical models to digital engineering systems.

LYMED (Lycée Méditerranéen)

2024 – 2026

CPGE MP (Classes Préparatoires aux Grandes Écoles)

Two-year intensive undergraduate program preparing for the highly competitive national entrance exams to French engineering schools.

- Rigorous scientific background with a strong emphasis on Mathematics and Physics.
- Developed advanced analytical thinking, resilience, and complex problem-solving abilities.
- Acquired strong foundations in Engineering Sciences and Computer Science.
